

3U CompactPCI Passive Extenders

CompactPCI Mini Extenders are designed to provide protection to the backplane connectors. They also function as adapters allowing to connect Rear I/O cards to front connectors. Versions with Female top connector require connector saver to create functional extender. The advantage of using Connector Saver is cost saving and ease of replacement. When Connector Saver becomes damaged simply replace it without having to replace whole extender. For 3U Rear I/O Mini Extenders, 6U Mini Extenders and other custom configurations visit www.az-com.com or call AZ-COM at 925-947-1000

SPECIFICATIONS:

PCB material FR4:
Maximum Current: 1A each power pin, 50mA each signal
Dimensions: Width - 100 mm, Height - see drawings
Weight: 1.2 -2.5 Oz depending on model
