

ISA Mini and Passive Extenders

SPECIFICATIONS:

P/N 9900-22-05	mini extender
Weight:	1.4 oz (40 gram)
P/N 9900-22-06	right angle mini extender
Weight:	1.4 oz (40 gram)
P/N 9900-23-01	passive extender
Weight:	4.5 oz (128 gram)
Material:	2 layer FR4

The ISA Mini Extender is primarily a throw-away connector saver for the ISA Electronic Extender. Simply replace the Mini Extender when it shows wear rather than resoldering a new connector.

The Passive ISA Extender is a classic extender card used for prototyping, designing, and troubleshooting computer adapter cards. All lines are clearly marked for easy identification.

Addition of the optional pin headers transforms the Passive AT Extender into a diagnostic tool by providing easy access to all signals for logic analyzer probes.
